● Chapter 1

DISCUSSIONS:

The team discussed the contents and development of Chapter 1 for the system titled "Persons with Disability Management Information System (PWD MIS)" focused on Barangay Nangka. The discussion included the project overview, background, purpose, and scope of the system. The team agreed that the system should feature PWD registration, categorization, ID creation, and report generation, all accessible through localhost for barangay use.

The project roles and responsibilities were also reviewed, ensuring that each member understood their designated tasks such as documentation, communication, design, and development. Additionally, the team planned the timeline for the data gathering, planning, and design phase, which will cover requirement analysis and system design creation for the first semester of the school year.
